GENERIC GRAPHICS

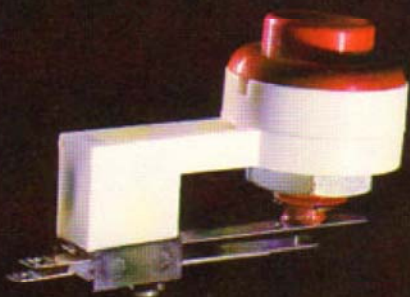

Exclusive Willis™ generic graphics are designed to fit any game cabinet. Apply the side decals to a clean, moistened cabinet. Push out any air bubbles, then trim around cabinet edges. You now have a brand new looking cabinet. Apply the universal control panel overlay to the old control panel. Trim out the holes and edges. Our marquee overlay will go right over the front of the old piece, and still backlight. To replace your damaged viewing glass, you simply place a generic viewing glass bezel behind a new piece of clear glass or plexiglas. In minutes you can convert a game that has been beat-up into a game that looks like new. Additional Willis™ generic graphics are on their way — so check with your Wico representative.
